'Stay home!'

written and  
illustrated  
by  
Caroline Pedler

This is  
Bird

Bird loves walking  
in the countryside

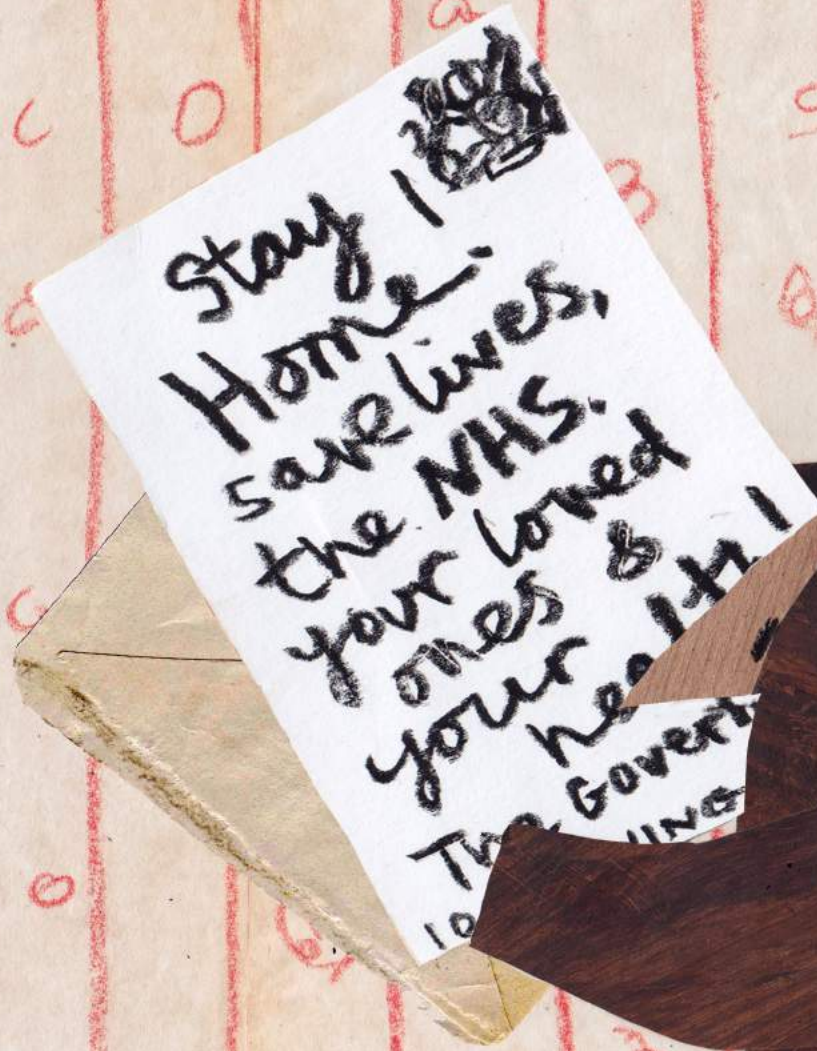

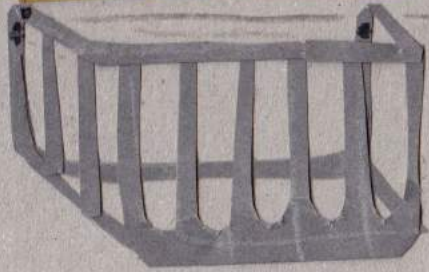

and seeing  
his friends

...but one day  
he was told

'Stay home!'

Bird loved  
his home and  
tried his best\*

\*he really did!

... but he enjoyed  
going out more!

been  
ough t  
ity, t  
ence, a nam  
Air is presented by t  
ed ys of the blue end of to the phe  
when they become luminescent chemical  
being sent through uranium spectrum  
of quinine, horse-chestnut be visible by  
Stramonium. In this way green solutions  
of fluor-spar, may give out blue rays, as  
to the colour of the surface of the, not  
to its power of modifying the rays but  
on it. The phenomenon appears to be  
tical with phosphorescence. It is due to  
refrangibility of the rays being lowered  
degraded by the action of the substance.  
tu

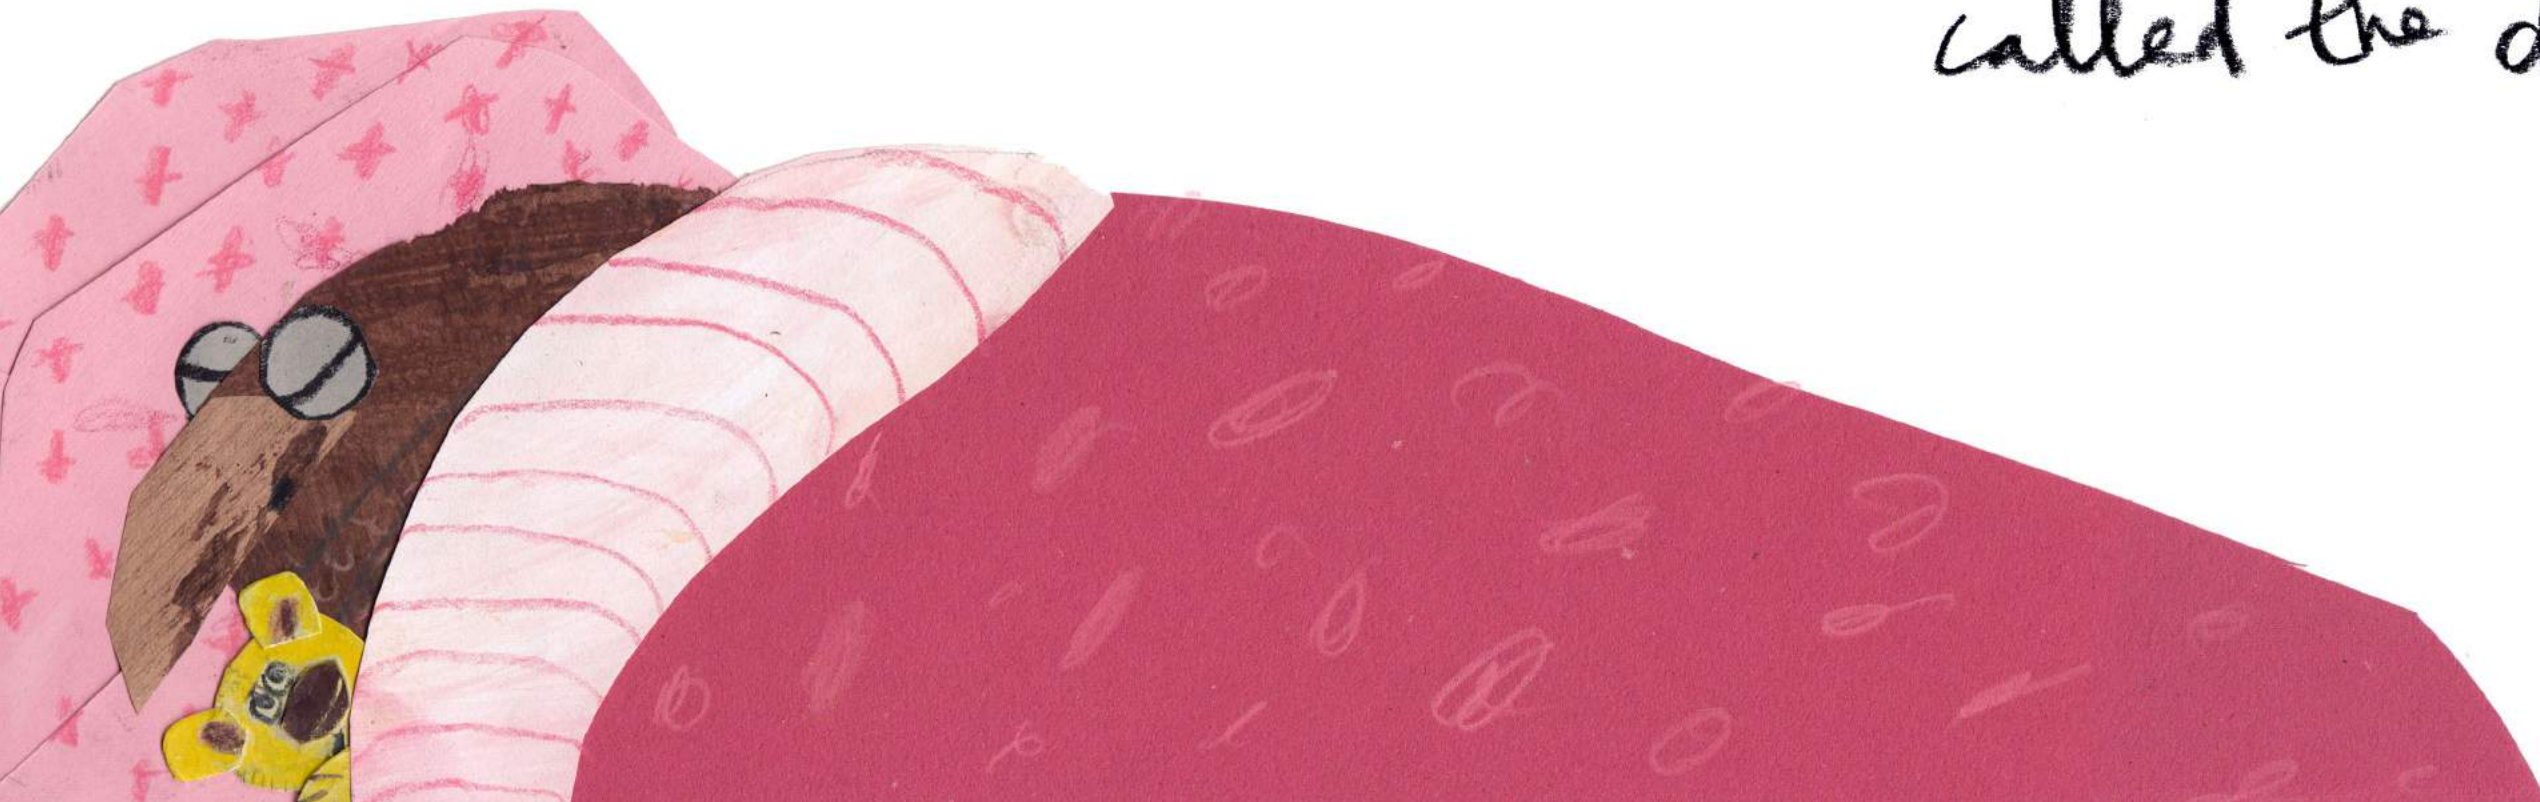

So bird went to  
see his friends,

... just for  
a chat!

When Bird got  
home, he felt  
so poorly he  
called the doctor.

"is there a cure?  
asked bird

"no,"

'Stay home!'

said the doctor!

... and the nurse,  
the porter, the  
cleaner, the bus  
driver, the teacher,  
the care worker,  
the grandmother,  
the sister, the  
brother, the friend  
and the mirror!
